

Pet Emergency Plan

1. Have a place in mind

Know where to go (day and night). Your nearest emergency vet over the festive period may not be at your usual practice. Vets Now clinics are open 24/7 at Christmas and New Year. Find your nearest clinic here: vets-now.com/christmas

2. Know the numbers

Know your emergency vet's number (both daytime hours and out of hours). Save them to your phone and pin them up on your kitchen noticeboard.

3. Think transport

Always have a plan for how you'd get to your nearest emergency vet; whether by private or public transport. This includes having pet carriers available if required.

4. Prepare for payment

Be prepared for payment of your pet's emergency treatment. Make sure that your insurance is up-to-date and the details are to hand.

5. Have their history to hand

Note your pet's medical history, especially current medication. And remember to pass it on to anyone looking after your pet.
